# 1. Overview

Hey there,

Welcome to your complete guide to electronically scoring a game of Cricket. Before we toss the coin and get into the e-scoring application, we wanted to take this opportunity to thank you for putting your hand up to score, it's people like you that keep Cricket clubs running smoothly.

Over the next page, you'll discover a quick start guide, this is for those who are confident with technology and think they can waltz in like a optimistic tail ender and figure it out as you go (with the likelihood of a few learning mistakes).

Following the quick start guide are comprehensive instructions that cover multiple game scenarios. If you require further support or come across an issue, you can contact PlayCricket Support via [playcricketsupport.cricket.com.au](mailto:playcricketsupport.cricket.com.au)

Thanks again for putting your hand up!

Yours in Cricket,  
PlayHQ.

## 2. Quick start guide

SCORE.PLAYHQ.COM

Scoring platform recommended for desktop, laptop or tablet devices.

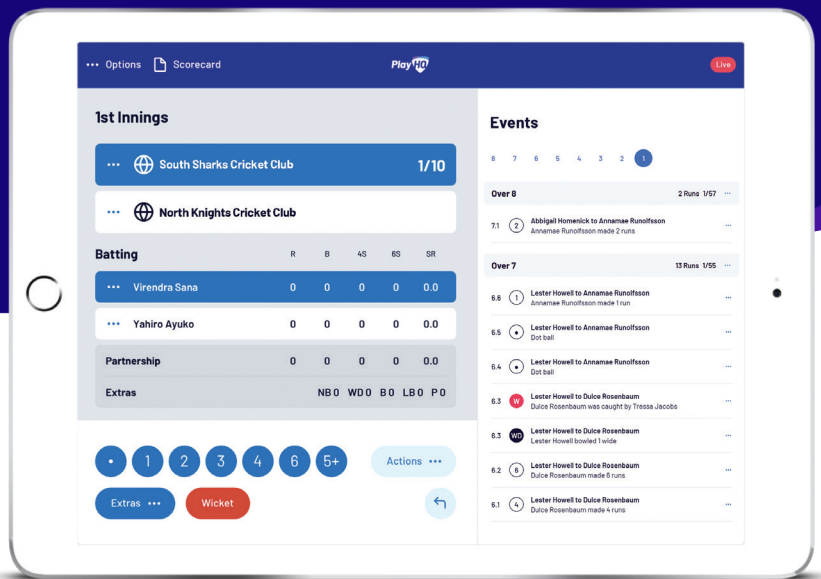

**3/87**  
15.1 OVERS

**Live**

Scores will be updated live if device is connected to internet.

Download & Score Game

If you run out of battery you can take over scoring on a secondary device. Ensure you're online prior to switching.

1

### Venue

Select a venue to get started. The venue for a game can be found within the fixture on [playhq.com](http://playhq.com)

### Dates

Select the days you wish to Score.

2

### PIN

The PIN is unique to this device and can be used to securely submit the result at the end of each game.

New PIN

Confirm PIN

Start Session

3

### Select Venue

Use an electronic scoring enabled login to enter [score.playhq.com](http://score.playhq.com) (the electronic scoring homepage), search and select the venue (name is as it appears on fixture).

### Enter Session Details

Select the day you are playing in order to download the game. Create a pin to secure the session. Click **START SESSION**.

### Select Your Match

Now that you're in a session, select the **day** of your match as well as the **ground**. Select the **upcoming match** you want to score.

4

### Innings Setup

#### Confirm Lineups

Select a team to confirm their lineup. Minimum 2 players per team.

<Home Team Name> 12/12

<Away Team Name> 12/12

5

### Setup Innings

Choose **NEXT** to confirm or update players from both teams. Team line ups will already appear if they have been selected prior to the match. Select who won the toss as well as the opening batters and bowler. To start scoring click **START INNINGS**.

### Recording Ball By Ball Events

There are multiple events that can be recorded. When this occurs in the game, select either the **batter** or **team** then hit the appropriate event. Additional options may follow depending on event type.

### Extras

When you click **EXTRAS**, a menu of options will appear including byes, leg byes, no balls, penalty runs and wides. When selecting **No Ball** with **Additional Runs**, the No Ball is already applied, meaning that the additional runs are scores off the bat.

### Changing Batter Or Bowler

To change a batter or bowler, tap on the player you wish to change then select **CHANGE**. Other options are also available involving the selected player.

### Undo Ball Event

You can click the **undo** button to undo the previous event or alternatively, you can click the **dots** next to the incorrect event within the **EVENT LOG**. Select **EDIT**, **REPLACE** or **DELETE EVENT**.

### Submit Game Result

When the second batting team finishes their innings, you will be prompted to **SUBMIT GAME RESULT**, ensure that the scores are correct before submitting final scores. Navigate to **END SESSION**.

# 3. Umpire signals

Here are some of the commonly used umpire signals used during a game of Cricket. It is important to understand what each of these mean when you score.

Four runs

Six runs

Bye

Leg byes

No ball

Out

Wide

Dead ball

Short run

Cancel call

## 4. Operating system and devices

The PlayHQ e-score app is web-based, so you don't need to download it from an app store and it will work across a range of devices including Desktop, Tablet and Mobile.

**For the best experience** with the electronic scoring application, PlayHQ suggests using these devices and browsers:

### PC

Windows 10 or later  
Intel Core i5 processor or higher  
8GB RAM or greater  
Google Chrome latest 2 versions (evergreen)

### Mac

OS X Yosemite 10.10 or later  
Google Chrome latest 2 versions (evergreen)

### iOS and Android

iPad 5th generation (2017) or later  
All Android devices later than 2017  
Google Chrome latest 2 versions (evergreen)

## 5. E-Score access

To use the e-scoring application, go to:

<https://ca.score.playhq.com>

To set up and score games on PlayHQ, you need electronic scoring or full admin rights for your club. Log in using your PlayHQ account. If you don't have access, contact your club administrator for assistance.

**PlayHQ**

Log in with your PlayHQ account

**Email\***  
Please type

**Password\***  
Please type

[Forgot password?](#)

Log in

Electronic scoring login screen

## 6. Best practice and tips

To enable good performance, we recommend the following steps prior to scoring a game:

- Close all other programs/browsers running on your device
  - Shut down additional tabs within your browser
  - Keep your operating system updated
  - Ensure your device is fully charged or a charger is connected throughout the game
  - Use a dependable WiFi or 4G/5G connection if you are planning to live score
- 

## 7. Game settings

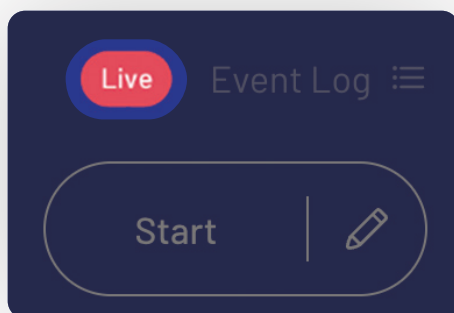

Please note all settings such as game type (2 Day, 1 Day or Twenty20), number of overs, number of dismissals, maximum bowler overs etc. are all set by the association managing the competition. These settings will flow through to the e-scoring application and are not required to be set up by the scorer. If you believe some of these settings may be wrongly applied, please contact your association or competition manager.

---

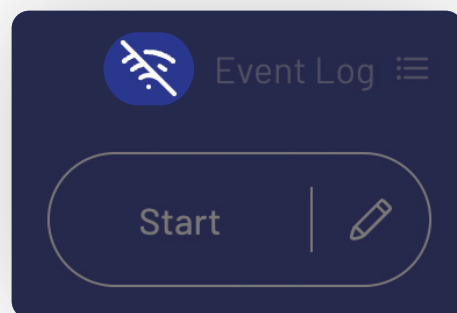

## 8. Live scoring and scoring offline

When the scoring device is online, live scores will be accessible to supporters via the PlayCricket app. To confirm the device is online, look for the 'Live' icon in the top-right corner of the scoring screen.

If internet isn't available, you can score offline. To do so, prior to the game when you're connected to the internet, select the game on the scoring device by starting the session (follow instructions in section 11.1). After selecting and entering the match, disconnect from the internet and score. Reconnect afterward to upload and sync game results.

ONLINE

OFFLINE

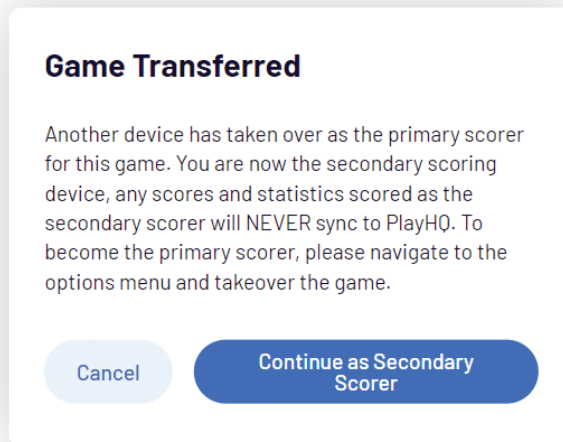

## 9. Device takeover

If you need to switch scoring devices at any stage, try to make sure the initial device is online to prevent data loss during the transition. The second device will take over scores and stats from the last time the original device was online.

On the second device, log in and initiate a session (See section 11.1), select the relevant game, then **Download and Score**.

Note that you'll be able to continue scoring the game on the original primary device, now as the secondary scorer.

To start scoring again on the original device follow the same steps as above.

Game transfer notification

## 10. Secondary scorer

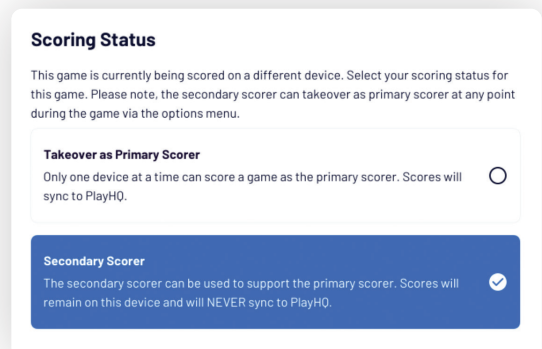

If required, multiple devices can be scoring a game. However, only one device can be considered the primary scorer and have scores sync to the PlayCricket app.

To become the secondary scorer for a game, setup the session (section 11.1) and select the game.

If the game is already being scored on another device, you will be prompted to either take the game over as the primary scorer or become the secondary scorer.

As the secondary scorer, you can now score the game, however no events will sync back to the PlayCricket app.

If at any point you'd like to become the primary scorer, you can do so by selecting **Options > Change Scoring Status**. This will prompt the device takeover option.

Change scoring status prompt

**IMPORTANT:** Please note that if a secondary device takes over the primary device the game's score will always begin from where the primary device was last connected to the internet.

# 11.1 Starting a session

After logging in to **ca.score.playhq.com**, pick the venue and match date(s).

Create a four-digit PIN, this is used to confirm game results at the end of the session. Note if another device takes over scoring one of these games, the PIN is not required to be entered to take over the game

### New Scoring Session

A scoring session is a collection of games you can download to this device across one or more days.

#### Venue

Select a venue to get started. The venue for a game can be found within the fixture on [playhq.com](https://playhq.com)

#### Dates

Select the days you wish to Score.

Today, 5 Jan 2022	<input type="checkbox"/>
Sat, 6 Jan 2022	<input type="checkbox"/>
Sun, 7 Jan 2022	<input type="checkbox"/>
Mon, 8 Jan 2022	<input type="checkbox"/>

New scoring session: Select venue

### PIN

The PIN is unique to this device and can be used to securely submit the result at the end of each game.

#### New PIN

#### Confirm PIN

[Start Session](#)

New scoring session: Create PIN

If you're unsure about the venue title, you can find it within the fixture on the PlayCricket App. Once all fields have been entered, select **Start Session**.

Once the session begins, select which day and oval the game you would like to score is on from the left menu.

Please be aware that there may be multiple matches scheduled on the same oval on the same day, so it is important to ensure that you select the correct match.

### PlayHQ Cricket Ground

#### Date

#### Oval

Oval 1	4 →
PCG2	0 →
PCG3	0 →
PCG4	1 →

New scoring session: Select ground

# Start innings

Once the match has been selected, choose **Next** to confirm or update players from both teams. Team line ups will already appear if they have been selected prior to the match, however, you can still make updates if necessary.

You will have the option to add or remove players who are allocated to the team. Use the plus or minus sign next to their name to make these changes.

The screenshot shows the 'Innings Setup' screen at step 1 of 2. The title is 'Innings Setup' with a progress indicator '1 2'. Below the title is the section 'Confirm Lineups' with the instruction 'Select a team to confirm their lineup. Minimum 2 players per team.' There are two dropdown menus for selecting teams, both showing '<Home Team Name>' and '<Away Team Name>' with a '12/12' indicator and a dropdown arrow. At the bottom right is a blue 'Next →' button.

Innings setup step 1: Confirm lineups

The screenshot shows the 'Innings Set-up' screen at step 2 of 2. The title is 'Innings Set-up' with a progress indicator '1 2'. Below the title is the section 'Toss' with 'Toss Winner' options for 'Home Team Name' and 'Away Team Name', each with a radio button. Below that is the 'Preference' section with 'Bat First' and 'Bowl First' options, each with a radio button. At the bottom left is a blue '< Back' button, and at the bottom right is a blue 'Start 1st Innings' button.

Innings setup step 2: Innings details

The screenshot shows the 'Add Players' screen for the team 'Australia'. It has 'Cancel' and 'Done' buttons at the top. A message states 'Maximum of 12 players are required for this game.' There are two columns: 'Team Players - Out' and 'Line-up (4/12)'. The 'Team Players - Out' column lists Craig McDermott, Glenn McGrath, Ricky Ponting, Bruce Reid, David Warner, Steve Waugh, and Mike Whitney, each with a plus sign in a circle. The 'Line-up (4/12)' column lists Don Bradman, Adam Gilchrist, Matthew Hayden, and Dennis Lillee, each with a plus or minus sign in a circle. A 'Wicket Keeper' (WK) slot is also present with a plus sign in a circle. At the bottom right is a blue '+ Add Fill-in' button.

Innings setup step 1: Add players

Next, select which team won the toss and whether they chose to bat or bowl.

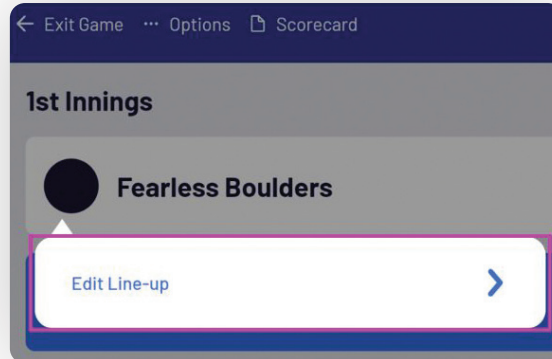

Select the opening batters and indicate who is on strike. Finally, select the opening bowler.

To start scoring, select **Start Innings**.

## 11.2 Entering and edit player line-ups

Player line-ups can be edited or entered at the time of setting up the innings as per instructions in 11.1.

Line-ups can also be edited once the innings has started by selecting the team and selecting edit line up.

Edit line-up option

## 11.3 Recording events

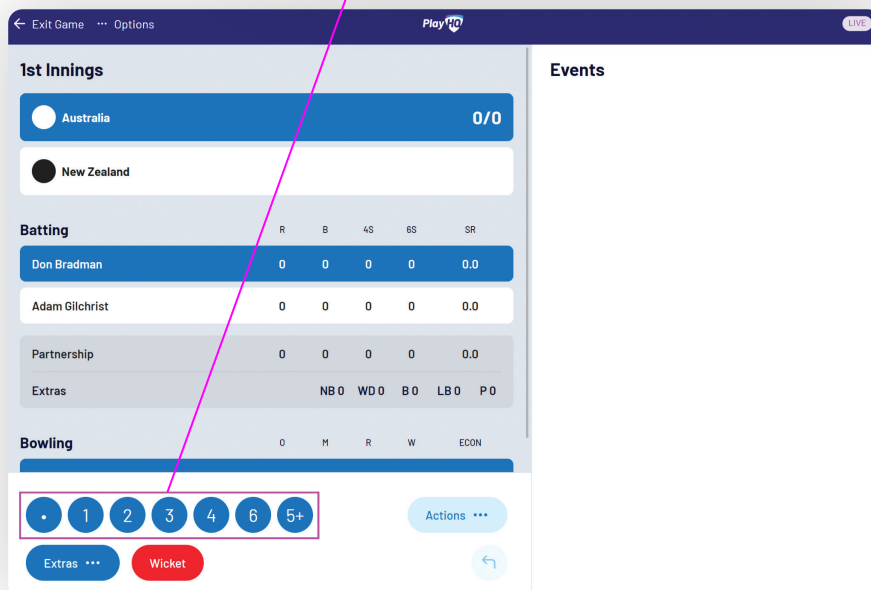

### 11.3.1 Runs

To record runs or a dot ball, select the **number of runs** that were made off the delivery or select the **Dot Ball** button. The selected number of runs will be automatically assigned to the strike batter highlighted in blue.

The team scores, event log, batting statistics, bowling statistics and partnerships will all be updated accordingly.

Select runs

Runs button location

## 11.3.2 Wickets

To record a wicket, select the **Wicket** button:

Wicket

The Batter Out will default to the Strike Batter. Use the **Change** button to select the non-strike batter if required.

Select the **Dismissal Type**.

For **Caught**, **Run-out** or **Stumped** dismissals, you can also select the **Fielder** or select **Skip**.

For some dismissal types, you may also add extras, runs or wides that occurred during that ball.

Select whether the batters crossed to determine the next strike batter.

Select **Next** after you have selected the dismissal type and any optional extras.

Select the **New Batter** then **Apply Wicket** to complete entering the wicket, or select **Back** to change the wicket and extra details.

*Please note: The new batter selection page will not be displayed for grades that allow unlimited dismissals or if the last batter has been dismissed.*

### Retired out

In an event where a batter has to **Retire Out**, meaning they cannot return to complete the innings, you will access this via the wicket flow.

Select wicket, locate **Retired Out**. You will be then asked to add in the next batter.

### 11.3.3 Extras

To record an extra, select the **Extras** button.

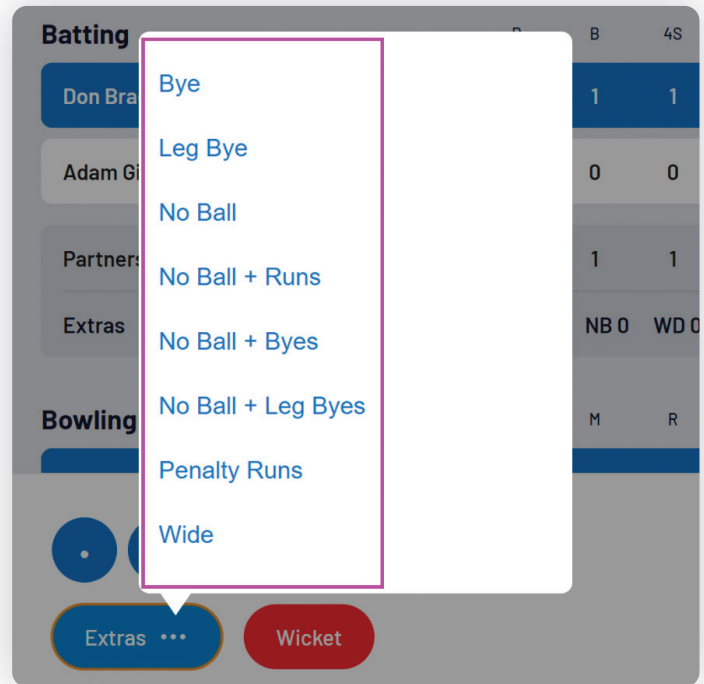

Select the appropriate Extras button.

When selecting **Byes** or **Leg Byes** enter the number of byes or leg byes, then select **Apply**.

When selecting **No Ball + Runs**, **No Ball + Byes** or **No Ball + Leg Byes**, enter the runs that were made by the batters only.

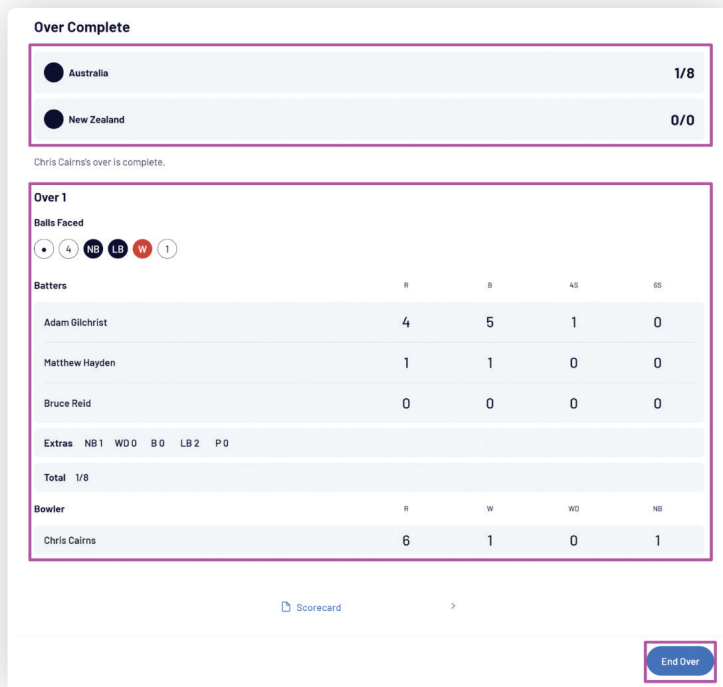

Any bonus runs awarded for the extra, will automatically be added to the batting team's score. The same applies for wides.

When selecting Penalty Runs, select the Team you wish to apply them to, and how many **Runs** to apply and **Apply Penalty Runs**.

## 11.4 Ending an over and adding additional balls to an over

Over summary

### Ending an over automatically

The end of an over will automatically trigger based off the number of balls bowled.

A pop up will appear displaying the current team scores and a summary of all the events that occurred within that over.

Select **Return to Scoresheet** to make updates to events within the over.

Select **Scorecard** to view or adjust the team scores or batter statistics.

Select **End Over** to commence the next over.

Select the **New Bowler** then **Start New Over** to commence the over.

### End an over manually

To end an over early, select the **Actions** menu and **End Over**.

End over prompt

## Add event

In a scenario where e-scoring has entered the end of over summary screen, but the umpire allows a 7th ball to be bowled, you can add the event before proceeding to the next over.

On the summary screen, scroll down to the bottom of the pop-up window, select **Add Event**.

# 11.5 Changing a batter or bowler

## Change a batter

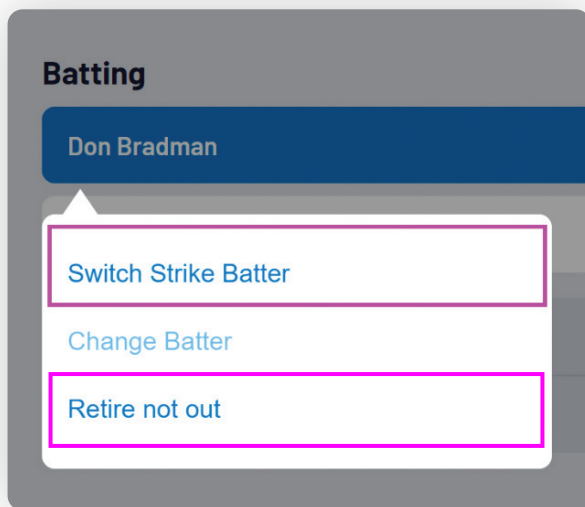

A batter can be changed even with balls and runs attributed to their name.

By selecting **Change Batter**, the incoming batter replaces the outgoing but retains the stat line.

To avoid that, it is recommended that a batter retires not-out.

Change batter prompt

Retire not out prompt

## Switch the strike batter

To switch the strike batter, select any of the two batters then select **Switch Strike Batter**.

## Retire not out

Retiring a batter not out removes them as the current batter and allows them to return to bat at any time later in the innings.

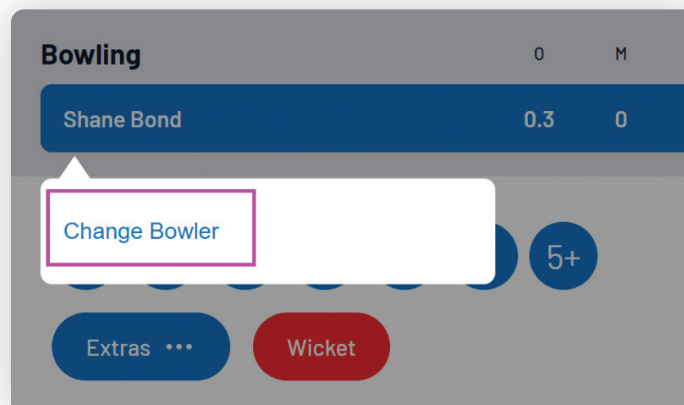

To retire a batter not out, select the batter you wish to retire then select **Retire Not Out**: Select the **New Batter** then select **Retire Batter Not Out**.

## Change Bowler

Changing a bowler allows an injured bowler to be replaced during an over.

To change the bowler, select the **Bowler** then select **Change Bowler**. The new bowler will replace the previous bowler.

In the event that you mistakenly have selected the wrong bowler for an over, it can be easily fixed via the event log and clicking on the **'3 dots'** for that particular bowler followed by **Change Bowler**.

Change bowler prompt

# 11.6 Deleting, undoing, editing events

If you've made a mistake, you can easily use the **undo** button to remove the previous selection. If you need to go back further in time, you can directly edit any previous deliveries from the events section. Navigate to the over and select the **'3 dots'** next to the relevant ball.

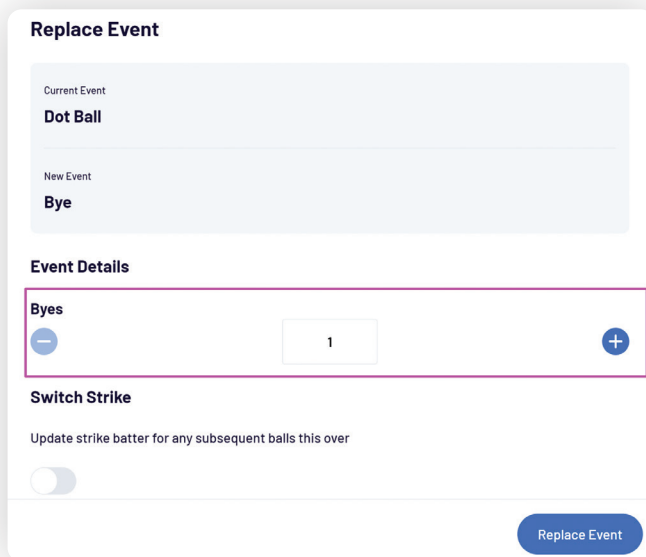

Once the event has been deleted, you can add a new event. Note that this event will be added as the next event, not replace the deleted one. To replace an event, see the next section.

## Replace Event

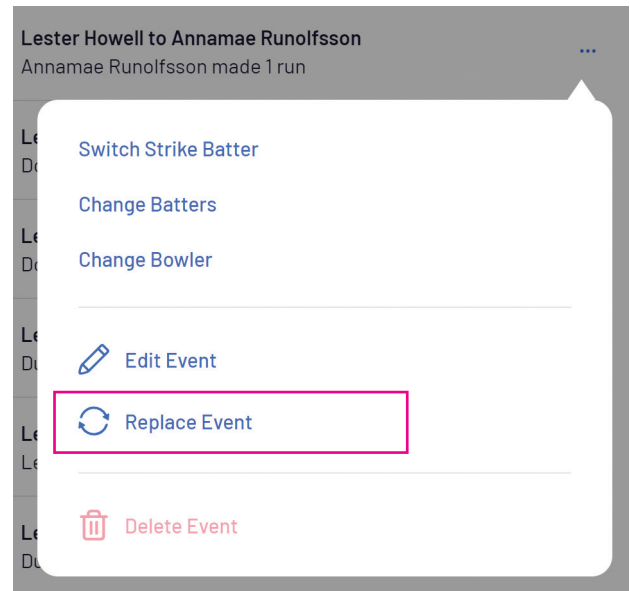

To replace a ball select the **'3 dots'** next to the relevant ball. You may replace any event within the innings and can navigate to prior overs using the over numbers under the events heading.

Select **Replace Event**.

Select the **new event**.

Replace event details

Edit event prompt

Configure the new event. For example, change or enter the number of runs or extras.

Toggle the **Switch Strike** on to adjust the strike batter for all remaining balls in that over. Batting statistics will update automatically.

Select **Replace Event** to make the change.

# 11.7 Scorecard edit

A teams innings total or a batters total runs can be edited at any stage in the scorecard.

Select **Scorecard** from the scoring screen or Scorecard at the end of an innings on the over summary.

Location of Scorecard button

## Team's Innings Total

To adjust a team's innings total, select the innings you wish to adjust.

Select the **Down Arrow** icon aligned with the **Adjust Total Innings Score**.

Enter the adjustment you wish to make, this can be both positive or a negative adjustment and select **Apply Adjustment**.

## Batter's Runs Total

To adjust a batter's runs total, select the innings you wish to adjust their score in.

Select the **Down Arrow** icon aligned with the Batter that you wish to adjust. Any adjustments to a batters total will be added to the overall team totals.

Enter the adjustment you wish to make, this can be both positive or a negative adjustment and select **Apply Adjustment**.

Adjustments will always be visible throughout the match when you enter the **Scorecard** view. You can update or remove the adjustment anytime throughout the game by returning the adjustment to 0.

The screenshot shows a batting scorecard interface. At the top, there are two tabs: 'Batting' (selected) and 'Bowling'. Below the tabs, the 'Batting' section is displayed. It includes a table of batters with columns for Runs (R), Balls (B), 4s, 6s, Mins, and SR. The batters listed are Virendra Sana, Yahiro Ayuko, Xu Xuefeng, Maria José Botin, Lucy Miller, and Tania Perflyeva. Below the batters table, there is a 'BATTERS TOTAL' row showing 8 runs. Below that, there is an 'Extras' table with columns for NB, WD, B, LB, and P. The extras total is 2. Below the extras table, there is an 'Adjust Total Innings Score' section with a text input field containing '0' and a 'Down Arrow' icon highlighted with a red square. At the bottom of the scorecard, there is a 'Total' row showing 10 runs, 2.1 Overs, and 0 Adjustments. Below the total row, there is a 'Fall of Wickets' section with the text '1-12 Anqu Tamba, 2-20 Nawf El Azem, 3-27 El Mansur, 4-35 Yeo-Jin'. At the bottom right of the scorecard, there is a blue button labeled 'Apply Adjustment' highlighted with a red circle.

Batting scorecard

## 11.8 DLS and updating parameters

To adjust the over limit in an innings, select the **Actions** button and **Parameters**.

Change the **Over Limit** by using the **plus** and **minus** icons or by entering in the new number.

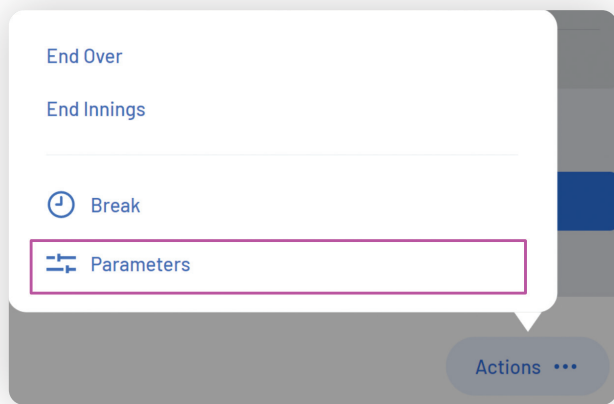

If the 2nd team is batting, you can also adjust their target total.

The target total will automatically default to the 1st team's score plus 1. You can adjust this manually by toggling on **Custom** and entering in a new score.

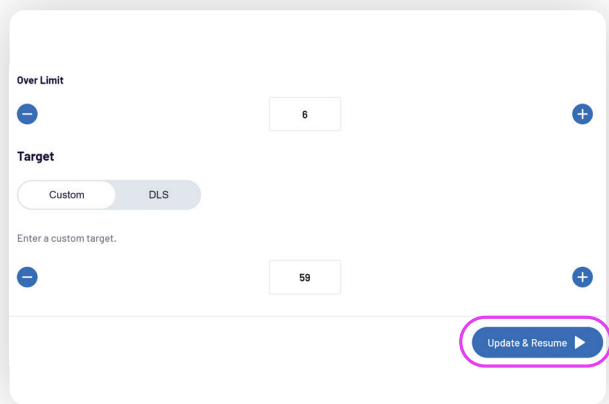

Alternatively, select **DLS** to automatically calculate the total target score based on Duckworth Lewis-Stern.

Select **Update & Resume**.

The innings or game will now automatically end when either the new over limit or target total has been reached.

Actions menu

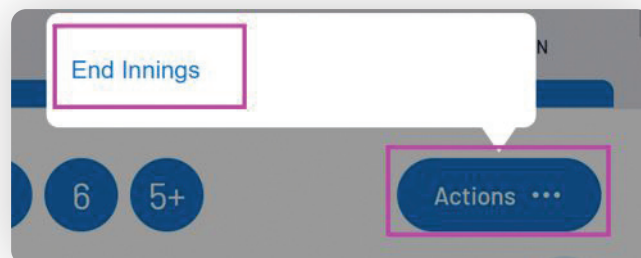

Updating parameters

## 11.9 Ending innings

T20 and One Day innings will automatically end if the second batting team passes the first batting team's total. Two+ Day innings will automatically end when the batting team is all out or the compulsory close limit is reached.

To end an innings manually, select **Actions** and **End Innings**.

Actions menu: Manually ending innings

To commence the next innings, select the new **Strike Batter**, **Non-strike Batter** and **Bowler** then **Start Innings**. In a Two Day+ Game you will also need to select the closure status.

Select **End Innings**.

## 12. Stumps

To end day 1 of a two day game, select **Actions** and **Stumps**. Select **Apply Stumps** and **Exit Game**.

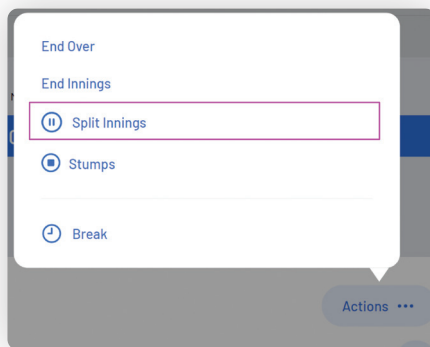

To continue scoring on Day 2, set up a new electronic scoring session as per instructions in 11.1 and select the game.

Note it is important to apply stumps to ensure those following the game live are aware of the current status.

Actions menu: Selecting stumps

## 13. Split innings

Actions menu: Selecting stumps

Split Innings is only available for Two Day+ games.

Splitting an innings allows the scorer to pause the 1st team's 1st innings and commence the 2nd team's 1st innings. Each team's 1st innings can be continually paused and resumed as many times as you like, but a 2nd innings can never be split.

During the 1st team's 1st innings, select **Actions** and **Split Innings**.

Review the scores and select **Split Innings** down the bottom.

Select the batters and bowler for the 2nd innings and select **Start New Innings**.

To resume the 1st team's innings, select **Actions** and **Split Innings**. Select **Resume Previous Innings**.

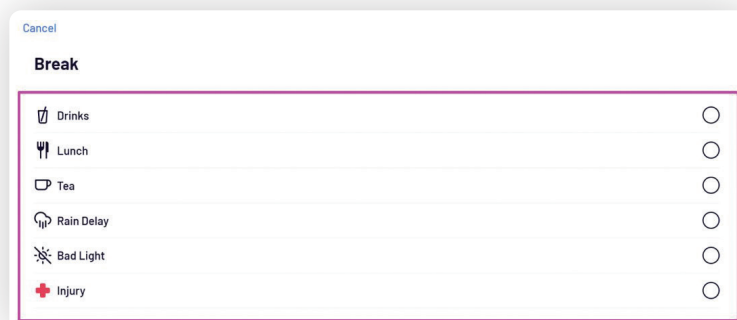

Ending an innings will happen as normal when all batter's have been dismissed or by manually ending the innings.

## 14. Recording breaks

To record a break, select **Actions** and **Break**. Select the **Break type** and **Apply Break**.

During the break, you will no longer be able to add events to the game, however you can edit events, make scorecard adjustments, change line-ups and change batter or bowler.

To resume from a break, select **Resume**, and the scoresheet will revert back to normal.

Break in play options

## 15. Ending a game

A Game Complete pop up will automatically appear in the last innings of a match if the over limit has been reached, the team is all out, or the target total has been reached.

When the Game Complete pop up is displayed, you can select **Return to Scoresheet** to continue the match, select **Scorecard** to view or adjust scorecard, or select **Submit Game Result** to finalise the game.

If finalising the game, enter the pin created at the start of the scoring session and **Confirm**.

If the game was scored online, wait until the device is connected to the internet before selecting **End Session**.

To end a game manually, select **Options** and **End Game**.

---

## 16. Ending a session

If the game was scored offline, you will need to wait until the device is connected to the internet before the session can be ended.

PlayHQ will alert you to any game results which have not been synced with a red error message in the top left hand corner as well as a red error on each game which has not synced.

In order for games to sync, the device will need to be reconnected to the internet.

Ensure there are no red errors on the screen before selecting **End Session**.

---

## 17. Frogbox

Frogbox is the preferred live-streaming partner for Cricket Australia. Allowing clubs and associations to capture every moment of the game from the weekend's play. With Frogbox's integration to PlayHQ, you can update the streaming graphics and scores at the same time using E-Scoring.

First you will need to nominate the matches you wish to capture via a live-stream. To do this you will need to submit a streaming request to Frogbox's support team, who will flag the match for live-stream for you. In that request submission, you will need to list the PlayHQ URL for each match that you wish to live-stream. For more information and examples of this process please follow the QR code.

While E-Scoring via PlayHQ, you need to remember that this will control what vision is captured per ball on Frogbox, this process is called coding. To start the vision for that ball, you need to click the "Bowler Run-Up" button as they start their run-up. The coding process will start as soon as you click that button. If you click it too late or after the ball has been bowled, the coding process will start too late or even after the ball has been bowled. This means that the ball won't be coded correctly for match highlights. If you start it too early, you may have an extended highlight sequence.

---

Once you have clicked the **Bowler Run-Up** button, you will see all the scoring options become available. You will enter what happened on that delivery and that will update the coding, scores and graphics on the live-stream.

Bowler Run-Up button

---

## 18. FAQs and troubleshooting

### **The game settings don't appear to be correct (Eg. The number of dismissals, max overs per bowler etc.)**

These settings are all entered by the association when creating the competition. If something is not quite right, we suggest touching base with your club or association administrator who will be able to assist you.

### **How do I adjust parameters/apply DLS or end an innings?**

To update the parameters, apply DLS, end an over or innings early, select 'Actions' and then the appropriate action.

### **How do I add players who are not in the line-up or roster (Eg. Fill-in players)?**

Only players who are allocated to a team or added to the line-up in the admin portal will appear on the device. You can add fill-in players to a game by going to the relevant team's line up and selecting Add Fill-in followed by adding the relevant player information, however, please note this record does not link or connect to any existing PlayHQ profile. It's important to know that fill-ins can only play one game as a fill-in, after which, they must register.

### **When will results appear on the PlayCricket app? Are scores shown live?**

If the device you are using to e-score is connected to the internet, the scores will automatically be sent to the PlayCricket app in real time, allowing supporters to see results live.

If the device is not connected to the internet, you will still be able to use e-scoring and the games will be synced to the PlayCricket app as soon as the device comes back online.

### **Can our scoreboard integrate with PlayHQ's E-Scoring?**

PlayHQ's electronic scoring application (E-Scoring) integrates with a host of scoreboard providers, to find out if your scoreboard is compatible, we recommend reaching out to the scoreboard company as they will be best placed to guide you through setting up the integration.

# 19. More help and support requests
